CSCI 176 (Parallel Processing) Spring 2021   Term Project Proposal   (10 pts)   Due: April 13 (T)

Please submit one-page proposal for your term project.

Your proposal should include the following four sections:

1. Problem description and motivation
   Please describe the problem/application that you plan to accelerate with parallel/high-performance computation models, and also describe the importance of accelerating the problem/application.

2. Existing solution approach:
   Please describe existing serial solution approach.
   Also describe existing parallel solution approaches if exist.

3. Your proposed parallel/high-performance solution approach/computation model:
   Please describe your idea/scheme/algorithm to achieve high-performance and implementation methodology (as detailed as possible).

4. Timeline to finish the project:
